

Basic Affective Valence

pathos: pleasure/pain, good/bad
co-constitutive with perception
(DA II.3, 414b4-6; III.7, 431a8-10)

THREE-FACTOR SCHEMA (DA III.10, 433b10-18)

LEGEND

A_n	Completed actuality (determinate node in the chain)
A_3 mode	A_3 orientational sub-mode (NOESIS / MEMORY / SPECULATIVE / DELIBERATIVE)
M_n	Motion segment (transition between actualities)
$DOKA$	Orthogonal committal dimension (supervenes upon any orientational mode)
Emo	Inline emotion-desire (when doxa is evaluatively complex)
$\tau_n \rightarrow n+1$	Temporal interval of the motion segment
U / MM / M	Three-factor kinetic roles (unmoved / moved mover / moved)
.....→	Basic affective valence (pathos): dispositional, non-mobilising
—→	$M_3 \rightarrow A_4$ Path 1: Deliberative (no doxa needed) — DA III.10, 433a13-15
- - - - -→	$M_3 \rightarrow A_4$ Path 2: Habitual rational (settled doxa as hēxis) — MA 701a13-14
- - - - -→	$M_3 \rightarrow A_4$ Path 3: Evaluatively complex (emotion-mediated) — DA III.3, 427b21-24
- - - - -→	Within-episode feedback: emotion impairs corrective faculty → further doxa
- - - - -→	Cross-episode feedback: $A_4 \rightarrow$ Settled Doxa (hēxis sedimentation, NE II.1)
- - - - -→	Recursive loop (A_4 changes the world → fresh $M_0 \rightarrow A_1$ cycle)
- - - - -→	Perceptual-phantasmatic zone (A_0 - A_2) / Noetic-orektikon zone (A_3 - A_4)
