

Basic Affective Valence

pathos: pleasure/pain, good/bad
co-constitutive with perception
(DA III.3, 414b4-6; III.7, 431a8-10)

THREE-FACTOR SCHEMA (DA III.10, 433b10-18)

PERCEPTUAL-PHANTASMATIC

co-constitutive
with perception
at A_0 - A_1

A_0 : Motion and Time as Ontological Horizon
kinēsis kai chronos

Each motion takes its
name from its terminus
(Phys. V.5, 228b25)

Recursive loop:
completed action
changes the world
→ fresh
 $M_0 \rightarrow A_1$ cycle

Unmoved: A_0 (motion-time horizon) + sensible object's active potency
Moved mover: sense faculty (analogical ext. of III.10 schema)
Moved: sense organ / perceiver

$M_0 \rightarrow A_1$: Perceptual Motion
aisthēsis — form received without matter (DA II.12, 424a17-24)

$\tau_0 \rightarrow 1$: medium transmits

TIME:
number of motion
(Phys. IV.11, 219b1)

A_1 : Completed Perception
Aisthēma + Affective Valence (*pathos*)

Unmoved: A_1 (completed perception)
Moved mover: phantasia (intensive faculty; 429a1-2)
Moved: psycho-somatic state

$M_1 \rightarrow A_2$: Phantastic Motion
Residual trace settles into determinate phantasma (DA III.3, 428b10-16)

$\tau_1 \rightarrow 2$: trace persists & settles

A_2 : The Phantasma Proper
Dual-aspect: formal imprint + affective charge

A_2 is the pivotal actuality: everything prior converges upon it; everything subsequent operates upon it as indispensable material

NOETIC-OREKTIKON

Unmoved: A_2 (phantasma) + settled *doxa* as *hexis*;
Moved mover: rational cognitive apparatus (unified)
Moved: rational animal

$M_2 \rightarrow A_3$: Cognitive Engagement
3 orientational modes + 1 committal dimension (*doxa*)

$\tau_2 \rightarrow 3$: multi-modal duration

Chain terminates at A_3 for NOESIS, MEMORY, and SPECULATIVE when content is non-practical: no *orexis* activated (DA III.10, 433a13-15)

Pure Noesis
intellection
phantasma
→ universal
atemporal
— terminates

Memory
past qua past
retrospective
feeds Discursive

Discursive
Speculative — terminates
Deliberative — feeds $M_3 \rightarrow A_4$

Deliberative
(no *doxa* needed)

DOXA — orthogonal committal dimension
supervenes upon any orientational mode: *holding-as-true-or-false*

Habitual rational
(settled *doxa* as *hexis*)

Emotion-Desire
(when *doxa* is evaluatively complex)
cog. eval. + conative + somatic

Evaluatively complex
(emotion-mediated)

Within-episode feedback:
emotion impairs corrective faculty → further *doxa* → further emotion
De Inven. 460b3-16
Rhet. 1378a20-22

non-mobilising:
bare phantasia → *apathēia* (427b21)

Unmoved: realizable good at A_3 (433b10-18)
Moved mover: *orexis* (emotion-structured or basic appetite)
Moved: animal via joint (433b21-25)

$M_3 \rightarrow A_4$: Orectikon Motion
Desire converging in action; somatic prep. internal (MA 702a17-19)

τ_3 : desire → motor act

"Virtually simultaneous" under normal conditions (MA 702a15-17);
"natural correspondence of the active and passive"

A_4 : Completed Action (*praxis*)
Motor loop closed; recursive

Hexis (Standing Dispositions)

technē *hexis* (Type 2: routine)
praxis *hexis* (Type 3: open resolution)

Cat. 8627ff · Met. Δ.20, 1028b4 · GA 18 §17

Hexis sedimentation:
praxis settles into standing dispositions (NE II.1)

LEGEND

- A_n Completed actuality (determinate node in the chain)
- A_3 mode A_3 orientational sub-mode (NOESIS / MEMORY / SPECULATIVE / DELIBERATIVE)
- M_n Motion segment (transition between actualities)
- DOXA Orthogonal committal dimension (supervenes upon any orientational mode)
- Emo Inline emotion-desire (when *doxa* is evaluatively complex)
- $\tau_n \rightarrow n+1$ Temporal interval of the motion segment
- U / MM / M Three-factor kinetic roles (unmoved / moved mover / moved)
- Basic affective valence (*pathos*): dispositional, non-mobilising
- $M_3 \rightarrow A_4$ Path 1: Deliberative (no *doxa* needed) — DA III.10, 433a13-15
- $M_3 \rightarrow A_4$ Path 2: Habitual rational (settled *doxa* as *hexis*) — MA 701a13-14
- $M_3 \rightarrow A_4$ Path 3: Evaluatively complex (emotion-mediated) — DA III.3, 427b21-24
- Pure appetitive bypass: $A_2 \rightarrow M_3 \rightarrow A_4$ (no A_3 , no *doxa*) — MA 701a32-33
- Within-episode feedback: emotion impairs corrective faculty → further *doxa*
- Cross-episode feedback: $A_4 \rightarrow$ Hexis (hexis sedimentation, NE II.1)
- Recursive loop (A_4 changes the world → fresh $M_0 \rightarrow A_1$ cycle)
- zone Perceptual-phantasmatic zone (A_0 - A_2) / Noetic-orekton zone (A_3 - A_4)
