

Basic Affective Valence
pathos: pleasure/pain, good/bad
co-constitutive with perception
(DA II.3, 414b4-6, III.7, 431a8-10)

THREE-FACTOR SCHEMA (DA III.10, 433b10-18)

Each motion takes its name from its terminus
(Phys. V.5, 229b25)

Recursive loop:
completed action
changes the world
→ fresh
 $M_0 \rightarrow A_1$ cycle

TIME:
number of motion
(Phys. IV.11, 219b1)

Orientational structure (inline at A_3 row):

1. Intellection (atemporal)
phantasma → universal
2. Memory (retrospective)
phantasma as past que past
3. Discursive (synthetic on phantasmata)
3a. Speculative → unchangeable
3b. Deliberative → realizable

Doxa — 4 functional modes (DA III.3):

- (i) Terminus — settled belief, non-practical content (chain ends)
- (ii) Habitual rational — doxa firm, no evaluative complexity, no emotion
- (iii) Evaluatively complex — doxa gates public emotion produced
- (iv) Superintend — doxa adds assertoric commitment to any mode involuntary: ouk eph' hēmin (427b17-21, 428a19-24)

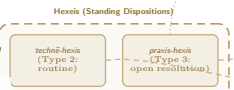

Emotion-Desire Composite (inline at chain)

Tripartite: cognitive eval. + conative orientation + somatic preparation
DA I.1, 403a25-b19: anger = desire for retaliation + boiling of blood
Emotion IS the form desire takes under evaluative conditions

Rhetoric II definitions:

Anger: desire for revenge for slight (II.2, 1378a30)
Pain: pain at imagined destructive evil (II.5, 1382a20-21)
Pity: pain at undeserved evil (II.8, 1385b15)

Variable: simple appetite bypasses emotion (MA 701a32-33)

Feedback:
emotion impairs
corrective faculty
→ further doxa
→ further emotion
De Incom. 400b3-16
Rhet. 1378a20-22
(interp. recon.)

non-mobilising
bare phantasma
apathēs (427b3)

LEGEND

- A_n Completed actuality (determinate node in the chain)
- A_3 modes A3 orientational sub-mode (NOESIS / MEMORY / SPECULATIVE / DELIBERATIVE)
- M_n Motion segment (transition between actualities)
- DOXA Orthogonal committal dimension (supervenes upon any orientational mode)
- Emo Inline emotion-desire (when doxa is evaluatively complex)
- $\tau_{n \rightarrow n+1}$ Temporal interval of the motion segment
- U / MM / M Three-factor kinetic rules (unmoved / moved mover / moved)
- Basic affective valence (*pathos*): dispositional, non-mobilising
- $M_3 \rightarrow A_4$ Path 1: Deliberative (no doxa needed) — DA III.10, 433a13-15
- $M_3 \rightarrow A_4$ Path 2: Habitual rational (settled doxa as hexis) — MA 701a19-14
- $M_3 \rightarrow A_4$ Path 3: Evaluatively complex (emotion-mediated) — DA III.3, 427b21-24
- Within-episode feedback: emotion impairs corrective faculty → further doxa
- Cross-episode feedback: $A_4 \rightarrow$ Settled Doxai (hexis sedimentation, NE II.1)
- Recursive loop (A_4 changes the world → fresh $M_0 \rightarrow A_1$ cycle)
- Perceptual-phantasmatic zone (A_0 - A_2) / Noetic-orektikon zone (A_3 - A_4)
